

SECTION II: SERVICE TOOLS

Type 'JB' Junk Basket – Valve Catcher: 2 3/8" – 4 1/2"

The **Rebco** Type 'JB' Junk Basket – Valve Catcher is engineered to be set in a No-Go type Landing Nipple, positioned directly below the Side Pocket Mandrel.

It is primarily used in gas lift operations during the changeout of gas lift or dummy valves. If a valve is accidentally dropped, the Catcher securely traps it, preventing damage to the equipment below.

The Junk Basket can also be installed above flow control devices to catch debris or foreign material that may fall around the system, offering added protection to the completion assembly.

Product Code: 163
